Supply Chain Risks

Cyber Security and Manufacturers

- 32% of Managed Service Providers (MSPs) <u>report</u> that manufacturing and construction industries are most targeted by ransomware.
- According to a recent SBA survey, 88% of small business owners felt their business was vulnerable to a cyber attack.
- An estimated 41% of companies have more than 1,000 sensitive files including credit card numbers and health records left unprotected.
- Cybercrime will cost the world \$6 trillion annually by 2021.

Cyber Security and Distributors

- Less than 40% of respondents in the firm's 2020 Manufacturing and Distribution Report said they performed important databreach prevention activities, such as penetration testing, phishing exercises with employees and assessments of vendors' data-security measures.
- Manufacturers and distributors have remained vulnerable to breaches; nearly half of survey respondents said that their companies had experienced cyber attacks within the last 12 months.

FEDERAL GOVERNMENT

Penalties

The examples below are based off a breach:

- Bank account numbers
 - One instance would be \$20

For example, 1,000 records = **\$20,000**

Each credit card number is worth \$100

\$1,000 records = **\$100,000**

- Each driver's license = \$10
 - For example, 1,000 driver's licenses = 1,000
- Safe harbor rules
